The only thing I can say is that we'll be posting some more stuff on this project in the VK group. Not soon, not much, but it will happen.

Remember end of that cow level? It ended so strange in original EWJ 2. Jim just opened gate, went forward and then... just go back to launch that weight on a swing. Weird. In remake there was a telepot after the cow-house gates. Jim goes to teleport and teleports himself to nearest asteroid, where Prof. creates cow monsters in his mini-lab. Also, original boss fights supposed to be wider with new fases. But I don't know details about this.
